

Advice Sheet 47: Completing the NRM soil analysis request form for Gatekeeper data reporting

For P, K, Mg, and pH soil analysis, NRM has a datafile reporting option to enable you to easily import soil nutrient data into Gatekeeper. Like any programme, Gatekeeper requires the data to appear in a specific position on the datafile to enable the import.

To utilise this function, completing the NRM soil analysis request form correctly is key. There are two options:

1. Whole field (non-spatial) results

For non-spatial field results (one sample per field), the field name should be entered in the **FIELD NAME OR O.S.No.** space on the form.

REPORT NUMBER		BATCH NUMBER		Standard Soil Analysis Request							
LABORATORY REFERENCE		FIELD NAME OR O.S.No.	SOIL TYPE	FIELD SIZE (A/H)	CROP CODE PRESENT	CROP CODE FUTURE	STRAW REM Y/N	FYM Y/N	*** Package Codes / Quote Reference / Additional Trace Elements		
	1	Plot 1									
	2	Plot 2									
	3	Plot 3									
	4										
	5										
	6										

Client Details

Name

Address

Post Code

NRM LIMITED
COOPERS BRIDGE
BRAZIER'S LANE
WINKFIELD
RG42 6NS

*** Please use the above column to specify against each sample where any additional analysis is required:
a) Package Codes (e.g. A003)
b) Quote References (e.g. Q12345)
c) Individual Trace Elements (e.g. Cu, B)

Merchant

Local Rep.

Phone No.

LIME RECOMMENDATION YES / NO *

On the Gatekeeper data file NRM provides, the **SAMPLE_REF** column holds the field name.

Do not combine spatial and non-spatial data on the same analysis request form. Please use separate forms for each.

2. Spatial results format

For spatial results (multiple samples per field), the plot reference should be entered in the **FIELD NAME OR O.S.No.** space on the form.

REPORT NUMBER		BATCH NUMBER		Standard Soil Analysis Request							
LABORATORY REFERENCE		FIELD NAME OR O.S.No.	SOIL TYPE	FIELD SIZE (A/H)	CROP CODE PRESENT	CROP CODE FUTURE	STRAW REM Y/N	FYM Y/N	*** Package Codes / Quote Reference / Additional Trace Elements		
	1	Plot 1									
	2	Plot 2									
	3	Plot 3									
	4										
	5										
	6
